

Virginia Sciacca holds a PhD in Marine Environmental Sciences. She is a marine biologist and ecologist, with a strong experience in bio-acoustics and PAM monitoring of marine mammals. She acquired her PhD in 2016 within an interdisciplinary project in a collaboration of the University of Messina with the Institute for Nuclear Physics of Catania and CIBRA. Since 2011, she has been working with the CIBRA - Interdisciplinary Center for Bioacoustics and Environmental Research at the University of Pavia and is conducting research at the Southern National Laboratories of the National Institute of Nuclear Physics (INFN-LNS) in Catania. During PhD studies, she collaborated with AWI- Alfred Wagener Research Institute of Bremerhaven – Germany – and with several other national and international Research Institution. She has more than 10 publications in peer-reviewed international journals and a number of conference proceedings
